GROWLER

Security System

The Growler is the loudest of our security systems which offers a fully upgraded package. This includes additional visual deterrents around the vehicle and additional internal and external sirens that pushes the wall of sound in every direction.

Main benefits of the Growler system

- Cab Door, Habitation & Bonnet Protection
- Five powerful sirens positioned in and out of the motorhome
- Three external sirens are fitted
- LED warning light inside the motorhome
- 3 x external LED's (upgrade to blue) (Positioning to be advised)
- Bonnet is protected by an encapsulated tilt sensor
- Hyper frequency module to detect unauthorised internal movement
- 1 x External locker door protection
- Accessory circuit allowing to extend the alarm externally to protect possessions such as bikes trailers or towed car
- Alarm activation using a very small discrete radio key fob
- Lifetime warranty (limited to the original owner and is not transferable)

Security Systems

SHADOW VTS

SHADOW VTS advanced tracking system installed in your motorhome for total peace of mind

SHADOW VTS is a Thatcham approved S5 GPS tracking system that is installed in your motorhome. When the engine is started, before the motorhome is even moved, SHADOW VTS will look for a dedicated driver identification device - one of the two ID Tags VanBitz supply when the SHADOW VTS is installed.

Should this ID Tag not be present, SHADOW VTS will immediately contact the National Control Centre.

In the very unlikely event that the motorhome should be towed away or, in the case of a smaller motorhome, be dragged onto a low loader, the system will alert the National Control Centre that an unauthorised movement is taking place.

In addition to the vital monitoring of your motorhome 24 hours a day, 7 days a week, you can access the information your motorhome is sending to the National Control Centre via an easy to use mobile application.

The National Control Centre is an independent monitoring centre approved by the National Security Inspectorate.

Shadow VTS is a must-have addition for your motorhome security. It is S5 Thatcham rated which is the highest specification Thatcham approved vehicle tracking systems available on the market.

SHADOW **VTS**

Security Systems

Non Starter MT

Peace of mind at the press of a button

Non starter

MT

APP Based GSM Immobilisation System

Non Starter MT paging/locating/immobilisation system can be installed alongside the Strikeback or the Growler System.

Non starter MT GSM immobilisation system is an APP driven PIN protected system that incorporates your mobile phone into your motorhomes security regime.

Activated by simply tapping the APP to send a message to engage your motorhome. Non Starter MT will totally immobilise your motorhome in the event of theft.

£549.00

Inc Fitting and VAT

Non Starter MT

(includes: First Year's Subscription thereafter £72.95pa)

Installation & Fitting

We offer free overnight stays on-site at Cornish Farm. Contact us for further information and to make a booking.

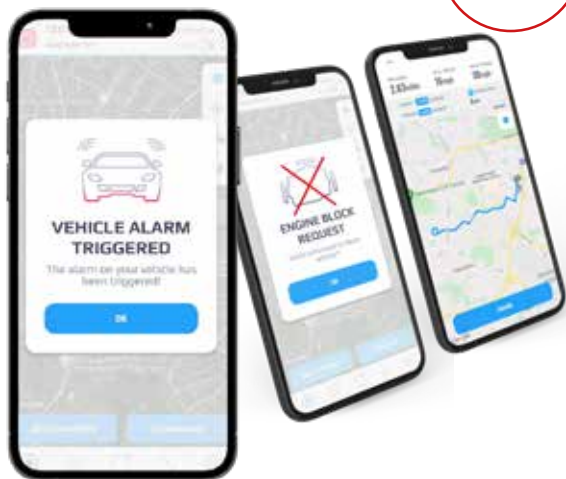

Please note: The Non Starter MT can only be installed if fitted at the same time as a Strikeback, Growler Security Systems and/or the Shadow VTS S5 Tracking System.

Non Starter

MT

Non Starter MT
will send a text
message and a push
notification to
all the devices:

- If someone triggers the alarm
- Disconnects the battery
- Moves the vehicle without the ignition turned on

The APP will provide the vehicles location and show if it is moving or if it is parked.

The most important feature of Non-Starter MT is the remote immobilisation facility. A simple press of a button will remotely immobilise your vehicle... starting the vehicle would be impossible even if the thief has your keys.

(Please note: This is not an insurance approved Thatcham tracking system).

Save money and combine Non Starter MT with the Shadow VTS at the total combined price of £699.00
(plus your chosen subscription).

On Board Diagnostic (OBD) Port Protection*

For the prevention of key cloning, VanBitz also offers OBD Port Isolation via the dedicated mobile application £200.00 inc VAT. (This is an upgrade to the Shadow VTS and/or the Non Starter MT).

Solar Panels

We keep a range of solar panels in stock. We also offer a fully automatic, self-tracking solar panel that in tests has proven to be up to 5 times more efficient!

Our most popular “package” suitable for most vehicles, is our 100-watt system, which charges both leisure and engine batteries.

Our solar panels, made out of mono-crystalline cells, in an aerodynamic frame, are mounted to the roof with a choice of mounting feet to suit the application. The regulator we use is an MPPT regulator manufactured by Victron that includes Bluetooth connectivity so the system can be monitored remotely.

These products are ideal for use in the UK as they are designed to work well in our climate, especially in the case of a clouded sky, when light intensity is changing continuously. An ultra-fast MPPT controller will improve energy harvest by up to 30% compared to PWM charge controllers and by up to 10% compared to slower MPPT controllers.

Batteries

When replacing one conventional battery with a lithium battery it virtually doubles the amount of useable power you have available and typically reduces the weight by 50%.

So if you're thinking about adding an additional battery? Think about the enormous advantage of adding TWO Lithium cells?

We offer a range of brands and sizes suitable for most vehicles. Please contact us for more information.!

Charging & Inverters

We offer a range of enhanced electrics whether you are in need of a definitive battery monitoring system, you are looking to upgrade your mains charging capabilities, or you just want to be more self sufficient and be able to use your mains appliances off-grid.

Please give us a call to discuss your needs and we will give you good, honest advice to what will enhance your camping experience.

**Contact us for

and pricing**

Van Bitz Battery Master

You can now easily keep you engine battery maintained even when mains hook-up is not available with the Van Bitz Battery Master.

Our specially designed, fully waterproof, resin-bonded product will monitor the engine and the leisure batteries constantly and whenever the engine battery needs a 'boost', Battery Master allows a safe and regulated controlled charge.

Included as standard with all solar panel installations.
